**FOR IMMEDIATE RELEASE**

## **TAKEUCHI INTRODUCES TB210R TO COMPACT EXCAVATOR LINEUP**

**Atlanta, GA:** Takeuchi-US, an innovative global leader in compact equipment, has recently updated its compact excavator lineup with the introduction of the all-new TB210R. The Takeuchi TB210R has many new and exciting features that enhance performance, durability, and serviceability. One of the key features is the minimal tail swing design. Couple that with a retractable undercarriage and backfill blade that can go from 40.2" wide down to 29.5" wide, and a new foldable ROPS/TOPS canopy that can reduce the machines overall height and you have a machine that can gain access to and work in some of the most confined applications.

Upgrades to the TB210R include pilot operated joystick controls with ISO/SAE control pattern change valve, selector valve, and pilot accumulator. Pilot controls deliver excellent fine control and responsiveness for greater productivity and reduced operator fatigue, and the addition of the ISO/SAE pattern change valve allows the operator to choose a preferred operational pattern. The addition of a selector valve for one-way and two-way auxiliary hydraulic flow enhances attachment versatility, and the new pilot accumulator enables the operator to easily remove residual pressure from the auxiliary lines.

A new Kubota D722-E4B three cylinder engine powers the TB210R and delivers nearly 22 percent more horsepower than its predecessor the TB108. The engine oil filter and dipstick are easily accessed through a lockable access panel located below the operator's seat. While the fuel fill, sight gauge, fuel filter with shut-off, and the dual element air cleaner are accessed through a lockable swing out panel located on the left side of the machine. The rear engine hood opens overhead providing outstanding access to the hydraulic tank and sight gauge, battery, coolant reserve tank, pattern change valve, and one-way flow selector valve.

The TB210R features a two-year, 2,000-hour warranty. For more information on the new TB210R model or on Takeuchi excavators, wheel loaders, track loaders, or skid steers, visit [www.takeuchi-us.com](http://www.takeuchi-us.com). Find Takeuchi on [Facebook](#) or on Twitter @TakeuchiMFG.

### **About Takeuchi**

Takeuchi is an ISO 9001 certified manufacturer of an extensive line of compact track loaders, compact excavators, compact wheel loaders, and skid steer loaders. Founded in 1963, Takeuchi was the first company to introduce the compact excavator to North America, setting the stage for one of the highest growth product segments ever introduced in the compact equipment market. The compact excavator has become a main line product for both rental and construction/utility companies. Takeuchi continued to lead the compact construction industry with the introduction of the first compact track loader to North America.
