TB135 Compact Excavator

TB135 Compact Excavator

- Tilt-up operator's platform combined with full opening engine compartment offers quick service access
- Emergency engine shutdown / return-to-idle system helps protect the engine from damage due to low oil pressure or high coolant temperature
- Cast iron, wrap-around counterweight protects the engine compartment from damage when working in confined areas
- Automatic fuel bleed system eliminates the downtime and service calls required to bleed conventional fuel systems
- Control pattern selector valve allows for quick change of operating controls between SAE and ISO patterns to accommodate operator preferences
- Variable displacement piston pumps efficiently utilize engine horsepower while continuously adjusting power and speed for fast cycle times
- Electrohydraulic push-buttons located in the left-hand joystick insure precise control of the auxiliary hydraulic circuit
