The TB2150 is the largest, most capable excavator in the Takeuchi line-up. It is completely redesigned and delivers improved functionality, performance, comfort, and serviceability.

A new EPA Final Tier 4 emission compliant Deutz TCD 3.6 liter, turbocharged engine produces 114 horsepower and 339 ft-lb of torque. This engine utilizes a DOC+SCR diesel exhaust after-treatment system and has no DPF for less maintenance.

The operator's station features an automotive styled interior that is refined and operator friendly. The spacious cabin features a deluxe high back air

suspension seat with heat, and a new 7" color multi-information display that keeps the operator informed of machine health and performance. For greater peace of mind, the TB2150 includes boom and arm holding valves, an overload alarm, and rearview camera which will help the operator see objects behind the machine via the new color monitor.

Additionally, telematics are now standard equipment using the Takeuchi Fleet Management System or TFM. This system is standard equipment for two years and it will provide real time machine information and enable the dealer and owner to be proactive with a scheduled maintenance program.

Large lockable service hoods provide vandalism protection and outstanding maintenance access.
