

FOR IMMEDIATE RELEASE

TAKEUCHI ANNOUNCES TL8R-2 COMPACT TRACK LOADER

ATLANTA, GA – Takeuchi-US, a global innovation leader in compact equipment, launches the completely redesigned TL8R2. The all new redesigned TL8R2 is engineered to provide superior power, strength, and maneuverability. The radial lift design offers a tipping load of 6,041 lb with an operating weight of 9,182 lb.

The TL8R2 is equipped with a 74.3 hp turbocharged engine that is EPA Final Tier 4 Emission Compliant. The Diesel Oxidation Catalyst (DOC) and Diesel Particulate Filter (DPF) featured on this machine minimizes emissions for clean and efficient operation.

Creep Mode is a standard feature on the TL8R2 models equipped with high flow auxiliary hydraulics. This feature will enable operators to precisely match the forward speed of the track loader to a particular attachment without having to constantly meter the travel lever. The creep mode function is ideal for attachments that require a consistent, repeatable travel speed, such as a cold planer and trencher.

The automotive styled operators station features a 5.7” multi-informational color display with a rearview camera and a sealed rocker switch bank that helps improve performance and functionality by providing the operator with a wider range of operational information. Also, standard equipment on the TL8R2 is the low-effort pilot controls and proportional auxiliary switches to give the operator the precision needed to work more efficiently in a comfortable, fatigue-free environment.

Additionally, a pressurized cab is an available option on the TL8R2. Optional cabs are equipped with a roll-up door, A/C, heat, defrost and front wiper, and AM/FM/Bluetooth radio providing all day comfort to the operator.

“Takeuchi is excited to release the completely redesigned TL8R2” said Keith Kramlich, National Product and Training Manager. “Takeuchi prides itself on our continuing tradition of innovation and advancing technology, and the TL8R2 is a perfect example of that. Operators will feel more strength, performance, maneuverability, versatility, and efficiency in this machine, increasing their profits.”

The TL8R2 Compact Track Loader is now available at Takeuchi dealers across the United States. To learn more about the TL8R2 – or any piece of Takeuchi equipment – visit www.takeuchi-us.com. And be sure to “Like” Takeuchi on Facebook and follow them on Twitter @TakeuchiMFG.

About Takeuchi

Takeuchi is an ISO 9001 certified manufacturer of an extensive line of compact track loaders, compact excavators, compact wheel loaders, and skid steer loaders. Founded in 1963, Takeuchi was the first company to introduce the compact excavator to North America, setting the stage for one of the highest growth product segments ever introduced in the compact equipment market. The compact excavator has become a main line product for both rental and construction/utility companies. Takeuchi continued to lead the compact construction industry with the introduction of the first compact track loader to North America.
