

FOR IMMEDIATE RELEASE

TAKEUCHI INTRODUCES NEW TB20e ELECTRIC COMPACT EXCAVATOR; SHIPS FIRST 100 UNITS TO UNITED RENTALS

Atlanta, GA (Feb. 2, 2022): The first 100 units of the TB20e, Takeuchi's new electric compact excavator, will soon be available at select United Rentals locations in North America. The TB20e is the first Takeuchi designed-and-built, battery-powered machine in what will be a full line of electric products developed to provide what today's customers want while meeting the manufacturer's own Environmental, Social and Governance (ESG) goals.

"The product and market development for the TB20e took place in North America, so it made sense to debut the machine here as well," said Clay Eubanks, director of global sales for Takeuchi. "We've partnered with United Rentals to introduce our first 100 units because of our long-standing relationship and our work together on current and future product needs. We're excited to see how their customers react to this new environmentally friendly excavator with all the power and performance they've come to expect from Takeuchi."

Similar in performance to Takeuchi's diesel-powered TB216 compact excavator, the TB20e is 100-percent battery-powered with zero exhaust emissions and reduced noise/vibration levels.

When fully charged, the TB20e offers a continuous working time ranging from four hours to eight hours, depending on the application and environment. The excavator has an operating weight of 4,255 lbs., a bucket capacity of 1.34 cubic feet and a primary auxiliary flow of 9.0 gpm. Maximum reach is 13 ft. 4 in. and maximum digging depth is 7 ft. 10.1 in. The TB20e also features a spacious and comfortable operator's station with a completely new high-definition, multi-informational color display.

"United Rentals and Takeuchi have a long history together, and we're pleased to be the first to offer the new, environmentally friendly TB20e excavator," said TJ Mahoney, vice president, supply chain for United Rentals. "Not only does this machine provide our customers with a more sustainable equipment option, it's also more cost-efficient to operate. We look forward to working with Takeuchi on additional electric-powered equipment innovations in the future."

About Takeuchi

Takeuchi is an ISO 9001 certified manufacturer of an extensive line of compact track loaders, compact excavators, compact wheel loaders, and skid steer loaders. Founded in 1963, Takeuchi was the first company to introduce the compact excavator to North America, setting the stage for one of the highest growth product segments ever introduced in the compact equipment market. The compact excavator has become a main line product for both rental and construction/utility companies. Takeuchi continued to lead the compact construction industry with the introduction of the first compact track loader to North America.
